We invite you to help FST students by supporting OSU's scholarship programs. Astonishing things happen when you share your achievements to bring success within reach of young people.

Your gift will make it possible for promising students to flourish in OSU's rich learning environment and throughout their lives. You have the power to change someone's future. Please join with the many others who have used that power to help educate and inspire the next generation of tomorrow's leaders.

Food Science and Technology Students at Work...

Welcome to...

OSU Department of Food Science and Technology

Wiegand Hall

30th & Campus Way ■ Corvallis, Oregon

We invite you to help students achieve the lifelong benefits of higher education by supporting OSU's scholarship programs.

Proven Success...

For 83 years, the OSU Department of Food Science and Technology (FST) has trained food scientists who have advanced the production of food in Oregon and elsewhere. Lately the Food Science program has grown significantly with the addition of new professors, more research grants, upgraded technology, new and improved courses, and most importantly...more students. The FST undergraduate enrollment is approaching 100 students. These students are dedicated to the science of food and beverages. However, with more students comes the increased need for more scholarship funds.

Why Scholarships are Important...

- Scholarships are the foundation of the academic recruiting process for most universities.
- Scholarships help the Food Science department attract top students who might otherwise attend other colleges.
- Scholarships help our students focus on their studies instead of working part or full time jobs.
- Scholarships allow our students to gain valuable practical experience by pursuing industry internships which may not offer competitive pay.
- Students who receive scholarships tend to contribute to scholarships once they have progressed in their career path.
- By helping a student today, you are encouraging generosity in future generations of food scientists.

Remember that all donations to OSU/FST scholarship endowments are tax deductible!

Recent FST Alumni...

E & J Gallo Winery
Fermentation Microbiologist

Leah Gerig
BS 2003

"Working as a team in the applied fermentation group and being challenged as an individual on a day to day basis has been great."

Doug Katella
BS 1999

"The thing that I love the most about being in the brewing industry is the relaxed nature of the business. It's not cutthroat and it seems that all the craft breweries work together, sharing information and ideas."

Cascade Lakes Brewing Company
Co-Owner

Pacific Foods of Oregon
Product Development Specialist

Nate Armbrust
BS 2000

"I get to do new things every day at work... The best part of my job is the satisfaction of seeing a new product through from start to finish."

Dave Gravelle
BS 2000

"I find my work very rewarding and if there is one piece of advice I can give, it would be: once you find something you like, stick with it. Although I gained valuable experience working in the production departments, I have found the quality assurance department to be my passion."

Tillamook County Creamery Association
Quality Assurance/Special Projects Mgr

Our Scholarships...

The good news in the department of Food Science and Technology is that enrollment has nearly doubled over the past two years. The bad news however, is the lack of scholarships available to support these additional students.

In an effort to meet this need, the department of Food Science and Technology is working to establish three new endowed scholarships:

- The **Wrolstad Scholarship** will be awarded to a FST student with a strong interest in food chemistry.
- The **General Food Science Fund** will assist students who excel in the Food Science and Technology Program.
- The **Oregon Brewing and Enology Scholarship** supports FST students who have a passion for brewing and wine making.

Alternatively, donors are invited to establish a separate endowed scholarship which can be named in honor of an individual, family, or organization.

For more information about about Food Science and Technology scholarships, please contact...
