The IFT Press series reflects the mission of the Institute of Food Technologists — to advance the science of food contributing to healthier people everywhere. Developed in partnership with Wiley Blackwell, IFT Press books serve as leading-edge handbooks for industrial application and reference and as essential texts for academic programs. Crafted through rigorous peer review and meticulous research, IFT Press publications represent the latest, most significant resources available to food scientists and related agriculture professionals worldwide. Founded in 1939, the Institute of Food Technologists is a nonprofit scientific society with 18,000 individual members working in food science, food technology, and related professions in industry, academia, and government. IFT serves as a conduit for multidisciplinary science thought leadership, championing the use of sound science across the food value chain through knowledge sharing, education, and advocacy.

Mathematical and Statistical Methods in Food Science and Technology

Edited by
Daniel Granato
Food Science and Technology Graduate Programme, State University of Ponta Grossa, Ponta Grossa, Brazil

Gastón Ares
Department of Food Science and Technology, Universidad de la República, Montevideo, Uruguay
Titles in the IFT Press series

- Accelerating New Food Product Design and Development (Jacqueline H. Beckley, Elizabeth J. Topp, M. Michele Foley, J.C. Huang, and Witoon Prinyawiwatkul)
- Advances in Dairy Ingredients (Geoffrey W. Smithers and Mary Ann Augustin)
- Bioactive Proteins and Peptides as Functional Foods and Nutraceuticals (Yoshinori Mine, Eunice Li-Chan, and Bo Jiang)
- Biofilms in the Food Environment (Hans P. Blaschek, Hua H. Wang, and Meredith E. Agle)
- Calorimetry in Food Processing: Analysis and Design of Food Systems (Gönül Kaletunc)
- Coffee: Emerging Health Effects and Disease Prevention (YiFang Chu)
- Food Carbohydrate Chemistry (Ronald E. Wrolstad)
- Food Ingredients for the Global Market (Yao-Wen Huang and Claire L. Kruger)
- Food Irradiation Research and Technology, Second Edition (Christopher H. Sommers and Xuetong Fan)
- Foodborne Pathogens in the Food Processing Environment: Sources, Detection and Control (Sadhana Ravishankar, Vijay K. Juneja, and Divya Jaroni)
- High Pressure Processing of Foods (Christopher J. Doona and Florence E. Feeherry)
- Hydrocolloids in Food Processing (Thomas R. Laaman)
- Improving Import Food Safety (Wayne C. Ellefson, Lorna Zach, and Darryl Sullivan)
- Innovative Food Processing Technologies: Advances in Multiphysics Simulation (Kai Knoerzer, Pablo Juliano, Peter Roupas, and Cornelis Versteeg)
- Microbial Safety of Fresh Produce (Xuetong Fan, Brendan A. Niemira, Christopher J. Doona, Florence E. Feeherry, and Robert B. Gravanis)
- Microbiology and Technology of Fermented Foods (Robert W. Hutkins)
- Multiphysics Simulation of Emerging Food Processing Technologies (Kai Knoerzer, Pablo Juliano, Peter Roupas and Cornelis Versteeg)
- Multivariate and Probabilistic Analyses of Sensory Science Problems (Jean-François Meullenet, Rui Xiong, and Christopher J. Findlay)
- Nanoscience and Nanotechnology in Food Systems (Hongda Chen)
- Natural Food Flavors and Colorants (Mathew Attokaran)
- Nondestructive Testing of Food Quality (Joseph Irudayaraj and Christoph Reh)
- Nondigestible Carbohydrates and Digestive Health (Teresa M. Paeschke and William R. Aimutis)
- Nonthermal Processing Technologies for Food (Howard Q. Zhang, Gustavo V. Barbosa-Cánovas, V.M. Balasubramaniam, C. Patrick Dunne, Daniel F. Farkas, and James T.C. Yuan)
- Nutraceuticals, Glycemic Health and Type 2 Diabetes (Vijai K. Pasupuleti and James W. Anderson)
- Organic Meat Production and Processing (Steven C. Ricke, Ellen J. Van Loo, Michael G. Johnson, and Corliss A. O’Bryan)
- Packaging for Nonthermal Processing of Food (Jung H. Han)
- Practical Ethics for Food Professionals: Ethics in Research, Education and the Workplace (J. Peter Clark and Christopher Ritson)
- Preharvest and Postharvest Food Safety: Contemporary Issues and Future Directions (Ross C. Beier, Suresh D. Pillai, and Timothy D. Phillips, Editors; Richard L. Ziprin, Associate Editor)
- Processing and Nutrition of Fats and Oils (Ernesto M. Hernandez and Afaf Kamal-Eldin)
- Processing Organic Foods for the Global Market (Gwendolyn V. Wyard, Anne Plotto, Jessica Walden, and Kathryn Schuett)
- Regulation of Functional Foods and Nutraceuticals: A Global Perspective (Clare M. Hasler)
- Resistant Starch: Sources, Applications and Health Benefits (Yong-Cheng Shi and Clodualdo Maningat)
• Sensory and Consumer Research in Food Product Design and Development (Howard R. Moskowitz, Jacqueline H. Beckley, and Anna V.A. Resurreccion)
• Sustainability in the Food Industry (Cheryl J. Baldwin)
• Thermal Processing of Foods: Control and Automation (K.P. Sandeep)
• Trait - Modified Oils in Foods (Frank T. Orthoefer and Gary R. List)
• Water Activity in Foods: Fundamentals and Applications (Gustavo V. Barbosa-Cánovas, Anthony J. Fontana Jr., Shelly J. Schmidt, and Theodore P. Labuza)
• Whey Processing, Functionality and Health Benefits (Charles I. Onwulata and Peter J. Huth)
Contents

About the editors xi
List of contributors xiii
Acknowledgements xvii

Section 1 1

1 The use and importance of design of experiments (DOE) in process modelling in food science and technology 3
   Daniel Granato and Verônica Maria de Araújo Calado

2 The use of correlation, association and regression to analyse processes and products 19
   Daniel Cozzolino

3 Case study: Optimization of enzyme-aided extraction of polyphenols from unripe apples by response surface methodology 31
   Hu-Zhe Zheng and Shin-Kyo Chung

4 Case study: Statistical analysis of eurycomanone yield using a full factorial design 43

Section 2 55

5 Applications of principal component analysis (PCA) in food science and technology 57
   Aurea Grané and Agnieszka Jach

6 Multiple factor analysis: Presentation of the method using sensory data 87
   Jérôme Pagès and François Husson

7 Cluster analysis: Application in food science and technology 103
   Gastón Ares

8 Principal component regression (PCR) and partial least squares regression (PLSR) 121
   Rolf Ergon

9 Multiway methods in food science 143
   Asmund Rinnan, José Manuel Amigo and Thomas Skov
# Contents

10 **Multidimensional scaling (MDS)**  
*Eva Derndorfer and Andreas Baierl*  
175

11 **Application of multivariate statistical methods during new product development – Case study: Application of principal component analysis and hierarchical cluster analysis on consumer liking data of orange juices**  
*Paula Varela*  
187

12 **Multivariate image analysis**  
*Marco S. Reis*  
201

13 **Case Study: Quality control of *Camellia sinensis* and *Ilex paraguariensis* teas marketed in Brazil based on total phenolics, flavonoids and free-radical scavenging activity using chemometrics**  
*Débora Cristiane Bassani, Domingos Sávio Nunes and Daniel Granato*  
219

## Section 3

14 **Statistical approaches to develop and validate microbiological analytical methods**  
*Anthony D. Hitchins*  
233

15 **Statistical approaches to the analysis of microbiological data**  
*Basil Jarvis*  
249

16 **Statistical modelling of anthropometric characteristics evaluated on nutritional status**  
*Zelimir Kurtanjek and Jasenka Gajdos Kljusuric*  
285

17 **Effects of paediatric obesity: a multivariate analysis of laboratory parameters**  
*Tamas Ferenci and Levente Kovacs*  
303

18 **Development and application of predictive microbiology models in foods**  
*Fernando Pérez-Rodríguez*  
321

19 **Statistical approaches for the design of sampling plans for microbiological monitoring of foods**  
*Ursula Andrea Gonzales-Barron, Vasco Augusto Pilão Cadavez and Francis Butler*  
363

20 **Infrared spectroscopy detection coupled to chemometrics to characterize foodborne pathogens at a subspecies level**  
*Clara C. Sousa and João A. Lopes*  
385

## Section 4

21 **Multivariate statistical quality control**  
*Jeffrey E. Jarrett*  
421
22 Application of neural-based algorithms as statistical tools for quality control of manufacturing processes 431
Massimo Pacella and Quirico Semeraro

23 An integral approach to validation of analytical fingerprinting methods in combination with chemometric modelling for food quality assurance 449
Grishja van der Veer, Saskia M. van Ruth and Jos A. Hageman

24 Translating randomly fluctuating QC records into the probabilities of future mishaps 471
Micha Peleg, Mark D. Normand and Maria G. Corradini

25 Application of statistical approaches for analysing the reliability and maintainability of food production lines: a case study of mozzarella cheese 491
Panagiotis H. Tsarouhas

Index 511
About the editors

Daniel Granato is a Food Engineer. He completed his Master’s degree in Food Technology (Federal University of Paraná, Brazil) in 2009 and undertook his Doctoral degree in Food Science (University of São Paulo, Brazil) from 2009–2011. In his Master’s dissertation, he used Response Surface Methodology (RSM) to model and optimize physico-chemical and sensory properties of a dairy-free dessert. In his PhD thesis, he used multivariate statistical techniques to assess the influence of the grape variety, origin, price, sensory properties, in vitro antioxidant capacity, instrumental colour and chemical composition of red wines from South America on in vivo antioxidant activity (using Wistar rats). He has worked at the Adolfo Lutz Institute (São Paulo, Brazil) as a Researcher in the Department of Analysis and Data Processing since 2012. He has authored more than 40 articles in international refereed journals and various presentations at Congresses. He has worked and collaborated with many research groups in the following fields: food safety, food development/optimization using RSM, chemistry, sensory analysis, chemometrics and sensometrics applied in food science and technology. He is an active reviewer of more than 30 scientific peer-reviewed journals.

Gastón Ares is a Food Engineer. He received his PhD in chemistry, focusing on sensory and consumer science, from the Universidad de la República (Uruguay) in 2009. He has worked as professor and researcher in the Food Science and Technology Department of the Chemistry Faculty of the Universidad de la República (Uruguay) since 2005. His research has been focused on the application of novel methodologies for the development and evaluation of food products and processes. He has extensive experience in the application of multivariate statistical and mathematical techniques. He has authored more than 80 articles in international refereed journals and numerous presentations in scientific meetings. He was awarded the 2007 Rose Marie Pangborn Sensory Science Scholarship, granted to PhD students in sensory science worldwide. In 2011 he won the Food Quality and Preference Award for a young researcher for his contributions to sensory and consumer science, and the Scopus Uruguay Award in Engineering and Technology. He is member of the Editorial Boards of both the Journal of Sensory Studies and the journal Food Quality and Preference, as well as associate editor of Food Research International.

Hu-Zhe Zheng, Department of Food & Nutrition Engineering, Jiangsu Food & Pharmaceutical Science College, Jiangsu Huai’an, China
Acknowledgements

Firstly, I need to thank God that I am here doing what I love: research. All people I love are part of this book and I dedicate this effort to them: Maria Aparecida Granato, Marcos Granato, Gustavo Granato, Felipe Borges, and all my dearest friends. Thank you for understanding and supporting me, no matter what.

I also would like to thank Professor Dr Anderson Sant’Ana for suggesting some of the topics covered in this book and for his support. I want to thank all authors who accepted the invitation to contribute to this book.

Daniel Granato

Thanks to all the authors for joining the project and providing high-quality contributions.
On a personal level I would like to thank my family and friends for their continuous love and support. Thanks for giving me the strength to achieve all my dreams.

Gastón Ares
