

Food Science Communicators

Expertise in the scientific study of food covers a broad spectrum of topics, so finding a reliable source for your story can take time. The Institute of Food Technologists provides quick access to expert sources through our **Food Science Communicators**.

Food Science Communicators include food scientists and nutritionists, laboratory researchers and extension specialists committed to sharing their knowledge about food with the public. Many have doctorates in food science, nutrition, or related fields and are either currently or previously affiliated with universities or colleges.

Reporters interested in contacting *Communicators* should contact IFT's Media Relations department for an interview.

Areas of Expertise include:

- Biotechnology
- Chronic Diseases and Food
- Consumer Trends
- Dairy Foods
- Dietary Guidelines
- Food Chemistry
- Food Microbiology
- Food Safety
- Food Packaging
